

Install Google Chrome on Windows

Purpose

This guide explains how to install Google Chrome on a Windows computer.

Prerequisites

- A Windows computer
- An active internet connection
- Permission to install software (if required)

Procedure

1. Open your default web browser.
2. Search for **Google Chrome**.
3. Open the official Google Chrome download page.
4. Click **Download Chrome**.
5. Wait for the installer to finish downloading.
6. Open the **Downloads** folder and double-click the installer.
7. If prompted by **User Account Control**, click **Yes** to allow the installer to make changes to your device.
8. Wait for the installation to complete.
9. Open Google Chrome from the Start menu or desktop shortcut.

Result

Google Chrome is installed successfully and ready to use.
